Dorothy,

This is a combination of wind speed records from cli-MATE Midwestern Regional Climate Center (<https://mrcc.illinois.edu/CLIMATE/>), the Weather Underground (<https://www.wunderground.com/history/>) and the National Weather Service (<https://w2.weather.gov/climate/>). It is the same for the other EER demonstrations. Many of the rural areas default to the nearest regional airport that provides hourly data, therefore some of the wind speed data relate to an adjacent county that contains the nearest regional airport with data.
